Maxtor onetouch 4 plus 750gb

△ No firmware found for this serial number Please check the serial and product numbers entered and try again. ✓ Downloads found for serial number Enter your serial number to find firmware downloads for your drive. The OneTouch 4 Plus is the next in a long line of advanced personal storage solutions from Maxtor. Inside the housing is a 750GB drive with a 16MB cache buffer and a 7200RPM motor for fast seek times and data transfers. The dual FireWire 400 and USB 2.0 interface lets you connect with virtually any computer.Maxtor has included a group of data security features. You can run automated back-ups on a schedule or push a button for non-scheduled back-ups. DrivePass is a two level password protection scheme designed to thwart unauthorized users. SafetyDrill is a reboot and recovery system that protects your PC in case of system failure or infection.High Performance Hard DriveThe high performance 7200 RPM, 750GB hard drive stores your movies, music, applications and documents for easy sharing with your friends and is also perfect for backing up your system.Dual InterfacesThe Maxtor OneTouch 4 Plus (Model STM3075040TA3E5-RK) external hard drive features USB 2.0 and IEEE 1394a (FireWire 400) interfaces for fast data transfer and plug-and-play connectivity to Mac and Windows based computers.Automated OneTouch BackupBack up your entire hard drive through a single press of the button or simply set the software to perform scheduled backups.Doubled SecurityThe Maxtor OneTouch 4 Plus (Model STM3075040TA3E5-RK) external hard drive features DrivePass and data encryption to safeguard your data against unauthorized use.Maxtor SafetyDrillMaxtor SafetyDrill provides a simple yet reliable solution for rebooting and recovering your PC hard drive's contents in case of system failure or virus/spyware infection. Once plugged in and turned on, the device will prompt you to install Maxtor Manager, an intuitive application that allows for a variety of backup solutions. You can choose to image the whole hard drive or backup and synchronize just selected files and folders. While we found the application easy to use and effective, it's not without flaws. First off, it doesn't allow for choosing just any folder on the hard drive to back up. For example, if you are using Windows XP, you won't be able to select any other folders in your profile aside from My Documents and Desktop. This means if you use Outlook, chances are you won't be able to back up the e-mail archive, which by default resides deep in the hidden Local Settings folder. You can, however, choose to image the entire content of your PC's hard drive. Then, should disaster occur, you use the included SafetyDrill CD to restore the whole system (SafetyDrill works with Windows only). Once set up, the backup process can be scheduled to run automatically or initialized by pressing the only one-touch backup button on the front of the device. Overall, we found the backup utility somewhat limited, but still appealing to home users who want a simple backup solution that works. The device was also very quiet and worked flawlessly during the testing process. We loved the rugged yet very lightweight and compact design. The black and brushed aluminum look gives it a vault-like appearance, unlike the I-beam look of the OneTouch III. The OneTouch button is elegant, though the light it emits could be a little too bright at night. Drive type External hard drive Connector options USB 2.0; Firewire 400 Available capacities 250GB, 500GB, 750GB Capacity of test unit (if applicable) 500GB Drive speed 7,200rpm Cache 16MB Dimensions (LWH) 6.0 x 2.5 x 6.75 inches Notable design features One-Touch backup button OSes supported Windows XP/Vista; Mac OS X 10.4.7 or later Software included Maxtor SafetyDrill, Maxtor Manager Service and Support five-year warranty; toll-free phone support is available weekdays from 6 a.m. to 8 p.m. MT; you can also chat or e-mail to tech support; Seagate's site (Maxtor is owned by Seagate) includes FAQs, user guides, data sheets, and a troubleshooter. We were impressed with the throughput performance of the OneTouch 4 Plus in CNET Labs' tests. It took only 9 minutes, 1 second to write a 10GB folder of mixed file types, just a bit faster than the Hitachi External Hard Drive and the SimpleTech SimpleDrive. It was slower than the competition in the read test, but not by too much, scoring 9 minutes, 16 seconds. All in all, it's relatively easy to recommend the Maxtor OneTouch 4 Plus. It's a simple, fast, and reliable backup solution for a single computer. If the backup software's lack of sophistication throws you off, you can always get another suite to work with the drive. Note: * Drive name (tested connection) The Maxtor OneTouch 4 Plus external desktop drive has a 750GB capacity and can connect to your PC through either USB 2.0 or FireWire 400 ports. It may not look pretty, but its good transfer speeds and fair pricing make it worth buying.The Maxtor OneTouch 4 Plus is a desktop drive, and it has a blocky shape that measures 150(l)x170(h)x63(w). Its case is comprised of a mix of polished aluminium with black plastic. Its sides are made of aluminium, and they are sunken, which provides a little more protection than all-plastic cases. A status light shaped like a bar sits on the front.The status light stays on while the hard drive is inactive, but it blinks while the drive is reading and writing data. It doubles as a backup button that launches the Maxtor Manager software when pressed. Because it requires external power, you'll need to be in the vicinity of a power outlet whenever you want to use the Maxtor OneTouch 4 Plus. There is no fan to cool the hard drive and this helps keep the OneTouch 4 Plus quiet; the only thing you'll hear is the spinning of the drive, but this is not a bothersome noise. The Maxtor OneTouch 4 Plus hard drive gets quite warm after a few hours of data crunching, but not to the point where it becomes uncomfortable to hold. The 750GB hard drive spins at 7200rpm and has a 16MB cache. It can connect to computers using both FireWire 400 and USB 2.0 ports.To test its speed, we copied 23 files with a combined size of 19.4GB between our test PC, which uses a Western Digital Velociraptor (WD3000GLFS) hard drive, and the Maxtor OneTouch 4 Plus external hard drive.Using USB 2.0, the Maxtor OneTouch 4 Plus external hard drive achieved a read speed of 28.58MBps and a write speed of 25.47MBps. When using FireWire 400, the Maxtor OneTouch 4 managed a read speed of 38.14MBps and a write speed of 25.85MBps. The small number of files that we used suits the FireWire 400 connection best, and this was reflected in our tests.Although FireWire 400 has a slower overall throughput speed than USB 2.0 (400Mbps vs. 480Mbps), it provides a better sustained transfer rate. This means that if you're transferring a small number of large files, you'll get faster speeds when using a FireWire 400 connection, but USB 2.0 will outperform it when you're transferring a large number of small files.If you're storing large files like movies and have a FireWire 400 connection on your computer, the Maxtor OneTouch 4 Plus hard drive will be much faster than an external hard drive that only provides a USB 2.0 connection.The read speed of the Maxtor OneTouch Plus 4 was similar to the one found in the Western Digital My Passport Studio II external hard drive, which also has both a USB 2.0 and FireWire 400/800 connection. This is despite the fact that the My Passport Studio II spins slower (5400rpm as opposed to 7200rpm). The transfer speed is limited by the connection's maximum throughput, not by the drive's spin speed.The Maxtor OneTouch 4 Plus external hard drives come with Maxtor Manager, which allows you to backup, synchronise and encrypt data. The program is easy to use and employs 256-bit AES encryption, which is currently one of the highest levels of encryption offered to commercial users. It creates a hidden folder for storing the encrypted data. Unfortunately, the encryption process is done on a file-by-file basis, so encrypting a folder with a large number of files takes some time. We encrypted 500 identical 1MB files and the entire process took 2min 54sec, and each file requires decryption before access is allowed.With a formatted capacity of 690GB, the Maxtor OneTouch 4 Plus' cost-per-gigabyte is 50 cents. When compared to the 81.5 cents per formatted gigabyte of the afore-mentioned Western Digital My Passport Studio II external hard drive, this is good value. However, if you don't need or have a FireWire port, you're better off with a Seagate FreeAgent Desk (ST310005FD4Z1E1-RK) because of its better looks, faster USB transfer speeds and a cheaper cost per gigabyte of 32.1 cents.So if you're looking for a desktop drive with FireWire 400 and USB 2.0 ports, and you don't mind the blocky design, the Maxtor OneTouch 4 Plus offers good speeds and a relatively good price. For consumers who need a simple solution with a classic design for Mac or PC, the Maxtor OneTouch 4 makes it easier to set up and manage data backup, file archiving and system settings with a new easy-to-use user interface. NOTE: THIS PRODUCT CANNOT BE SHIPPED TO MASSACHUSETTS OR DISTRICT OF COLUMBIA (WASHINGTON, D.C.) WARNING: The solder used in this product contains lead, a chemical known to the State of California to cause birth defects and other reproductive harm. Please wash hands after handling internal components and circuit boards and avoid inhalation of fumes if heating the solder. Amazon.com The Maxtor® OneTouch® 4 Lite solution is a full-featured backup and storage solution with Maxtor SafetyDrill™ for complete recovery of a hard drive's contents in case of a system crash or virus/spyware attack*. With two levels of data security and capacities up to 1 TB, users can confidently back up or sync work and home computers. Protect your data from unauthorized use.Back up your files with one touch of a buttonPortable Performance and Security Provide a safe haven for your entire working environment. Don't back up and protect just your files anymore. System crashes and virus attacks can happen, and it's difficult to get your computer back to just the way you like it. To prepare, should the unfortunate happen, Maxtor SafetyDrill automatically creates a snapshot of the entire contents of your PC's hard drive which can be readily booted for an easy and complete recovery. Backup all your precious memories to one safe, convenient place with one touch of the button or automatically with easy scheduling software. Maxtor's simple user interface makes it easy to protect your contents without even thinking about it and, just as importantly, restore it if needed. With this elegantly simple full-featured backup solution, Maxtor's software makes automated backup scheduling, specific file restoration, sync, security, drive and power management a snap. To safeguard against unauthorized use, Maxtor OneTouch 4 Lite comes with both data encryption and Maxtor DrivePass. It's simple to install - just plug the external drive into an available USB 2.0/1.1 port on your PC or Mac. With up to 1 TB, there's ample room for your important documents, videos, photos, graphics, and music in one safe, convenient location - over 16,660 hours of digital music or 320,000 digital photos or 1000 hours of digital video or 250 two-hour DVD quality movies or 500 games. The sleek and slim design of this hard drive—only measures 6.73 x 2.49 x 5.88-inches (H x D x W). The Maxtor OneTouch 4 Lite lets you transfer files seamlessly from your computer via its USB 2.0 connection at a brisk transfer rate of up to 480Mb/sec. The drive delivers a spindle speed of 7,200 RPM, giving you the high-speed performance you need to back your data up quickly and safely. At this compact size, and with this high performance, you now have the ability to take your data with you anywhere you go, so your digital content finally has room to breathe. A five-year warranty is also included, giving you complete peace of mind. Product Highlights - Maxtor® SafetyDrill™ prepares, boots and recovers a PC's entire internal drive contents in case of system failure or virus/spyware infection.* - Back up all your files with one touch of the button or automated scheduling. - Maxtor DrivePass™ and Encryption protects contents of drive in case unauthorized use. - Quick and easy installation with pre-loaded software - Simple Maxtor user-interface drive management, security and backup scheduling - 5-year limited warranty - Sync data between two or more computers on the same operating system. - Customizable Maxtor OneTouch® button - Plug and play storage - Auto Updater helps keep your Maxtor OneTouch solution current. - Drive and power management utilities - USB 2.0/1.1 compatible up to 480 Mb/sec data transfer rates - PC and Mac compatible - 7200 RPM, up to 16-MB cache buffer *Windows Only Maxtor® is the expert and the leader in designing simple external storage and backup solutions for consumers and professionals. Maxtor offers a broad line of trusted, intuitive storage solutions for safeguarding critical business data, digital files and personal memories. Maxtor developed the industry's first external storage device that features easy-to-use OneTouch® button backup and restore capabilities. The Maxtor® OneTouch 4 Lite solution is the easy way to back up and store photos, videos, games, music, business data, personal information and more. The OneTouch 4 Lite solution continues the OneTouch legacy as the leading external hard drive for small office users, consumers, creative professionals and mobile warriors. What's in the BoxExternal hard drive with preloaded installation software, USB 2.0 cable, Maxtor SafetyDrill Recovery CD, quick start guide, AC power adapter
